WHAT IS MEDICAL PHYSICS?
Medical physics is the application of physical sciences, engineering, and computer science to the study and improvement of medicine and healthcare.

ADMISSIONS PREREQUISITES
A strong foundation in a major in physics or a degree in another physical science, engineering, or mathematics discipline with coursework equivalent to that required for a minor in physics. GRE scores are not considered.

APPLICATION DEADLINE
Apply to our CAMPEP-accredited PhD Program in Medical Physics by December 1st: apply-bsd.uchicago.edu/apply

SELECT RESEARCH TOPICS
- Computer-Aided Diagnosis
- Radiation Therapy
- Functional Molecular Imaging
- Neurological Imaging
- Magnetic Resonance Imaging
- Machine Learning
- Deep Learning
- Nuclear Medicine
- Microscopy
- Ultrasound

QUESTIONS? CONTACT US!
Please do not hesitate to contact our graduate student representative or program director with any questions or concerns! They are both happy to talk about medical physics and/or the application process.
